

Manage User Access to Critical Information and Systems While Enabling Business Agility

IAM is a key business enabler and fundamental to conducting business in a secure manner.

A mature IAM posture has to be built on a firm foundation if it's going to protect your organization from cyber attacks. Ping, Delinea, SailPoint, and GuidePoint Security come together to automate and modernize your controls for zero-trust and least-privilege implementations.

Meet the expert group of proven security professionals protecting, defending and supporting organizations through the rapidly changing infrastructure and security landscapes.

GuidePoint Security covers the three pillars of Identity & Access Management from both a services and technology perspective. Our engineers and practitioners can identify leading solutions to help you manage user access to critical information assets and improve productivity. We are your trusted advisor, working with Ping Identity, SailPoint and Delinea on joint offerings and services to build a mature identity program.

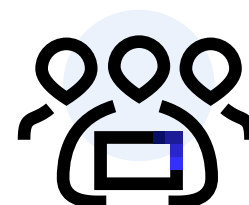

Ping Identity delivers intelligent identity solutions for the enterprise, enabling companies to achieve Zero Trust identity-defined security and more personalized, streamlined user experiences. The PingOne Cloud Platform provides customers, workforce and partners with access to cloud, mobile, SaaS and on-premises applications across the hybrid enterprise.

SailPoint is the leading provider of identity security for the modern enterprise, empowering organizations worldwide to put identity security at the core of their business. With a foundation of artificial intelligence and machine learning, SailPoint identity security delivers the right access to the right identities and resources at the right time.

Delinea believes every user deserves seamless, secure access, and administrators deserve privileged access controls without excess complexity. Delinea's solutions empower seamless security for the modern, hybrid enterprise with privileged access management (PAM) solutions that define the boundaries of access. With Delinea, privileged access is more accessible.

Put a Highly-Trained, **ELITE** Team on Your Side

We understand that delivering successful IAM programs requires personnel with various skills such as business analysts, architects and developers, as well as functional expertise of key lifecycle and compliance related processes. Our team of certified experts has assisted organizations across various industries with the design and implementation of large scale IAM projects.

Hundreds of Industry and Product Certifications

Trusted, Tailored Security Built to Meet Your Unique IAM Requirements

PingOne DaVinci is a cloud orchestration service for creating user journeys across various applications via a drag-and-drop interface. DaVinci is an open interface with integrations and connections across multiple applications and identity ecosystems. Build and design your own workflows or refine one of the workflow templates to customize your user journeys. Optimize your flows easily with A/B testing and deploy changes in quick succession.

SailPoint's AI-driven identity security solution delivers intelligence and frictionless automation using machine learning and analytics. SailPoint leverages trusted data intelligence to proactively discover, manage, and control all user access. As a result, organizations can make better decisions faster, spot potential threats, and maintain optimized access models.

Delinea knows cyber incidents are growing and so are rates and requirements of cyber insurance providers. Before granting you an insurance policy, insurers want to see that you're proactively managing your cybersecurity program and confirm you have effective controls in place to reduce risk. You can't wait until you start shopping for an insurance policy or negotiate your renewal to make sure you can answer their questions. Delinea can help you learn how to protect your Privileged Accounts and reduce your Cyber Insurance Costs.

The Right Approach

With **GuidePoint Security**, you gain a trusted advisor that provides you with the expertise and product-agnostic approach that is tailored to your unique needs and environment. Our highly certified security practitioners and consultants are here to guide you through the complex security maze and help you make more informed risk decisions at the speed of business.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
